WORK EXPERIENCE

Amazon Web Services (AWS)

Sept 2022 – Present · Seattle, WA

AWS Next Generation Resilience Hub · *Software Development Engineer III* · [[Launch blog](#)]

- Shaped the product vision, architected and **led development** of the next generation Resilience Hub, a new agentic AI-powered service that analyzes customer applications to help improve resilience posture.
- Built and **launched a full-stack private preview** in 2 weeks using the Strands Agents SDK, validating the product vision and securing leadership funding and engineering resources to take the service to production.
- Led a team of 8 engineers from prototype to production, launching next generation Resilience Hub in Q1 2026 and growing the service to **300+ external customers**, including large enterprises, **generating \$400K+ ARR**.

AWS Zonal Shift · *Software Development Engineer II* · [[Launch blog](#)]

- Designed and **developed core distributed systems** for AWS Zonal Shift, a globally available Tier-1 service that protects customer applications from Availability Zone failures.
- Expanded Zonal Shift into AWS isolated government regions, adapting the service architecture and infrastructure to meet the requirements of restricted AWS environments and **enabled GovCloud customers** to onboard to Zonal Shift.
- Led cross-service integrations with Elastic Kubernetes Service (EKS), and Network Load Balancer (NLB), expanding Zonal Shift support to additional AWS resources and **tens of thousands of customers**.

Pinwheel · *Software Development Engineer I*

June 2021 – Sept 2022 · New York, NY

Direct Deposit Switch · [[Product page](#)]

- Designed and built production data extraction and aggregation systems for Pinwheel's Direct Deposit Switch product, **improving customer conversion** rates across all partner banks integrated with the platform.
- Led end-to-end development of custom onboarding pipelines for Pinwheel's **largest integration partners**, Chime and Cash App, coordinating cross-functional teams from design through production launch.

PROJECTS

Daily Crossword · Shopify App · [[App Store](#)]

Feb 2026 – Apr 2026

- Built and launched a Shopify app that embeds customizable daily crossword puzzles into merchant storefronts.
- Developed an LLM-powered puzzle generation pipeline using Python, AWS Bedrock, and AWS infrastructure.

Pathless · Travel Itinerary Website

Sept 2024 – Mar 2025

- Built a community-driven travel platform for creating and discovering niche travel itineraries.
- Developed interactive map discovery and creation experiences so users can explore community-created travel content.

HedgeHog · AlgoTrading Platform

Mar 2022 – Jul 2023

- Built an algorithmic trading platform integrating with brokerage APIs to execute multiple trading strategies in parallel.
- Developed data pipelines using NumPy and Pandas to collect historical market data for strategy backtesting.

ProFlightPhotography · Start Up

July 2017 – July 2021

- Founded and operated a drone photography business serving dozens of real estate and private automotive clients.
- Built the business from scratch through direct marketing, web presence, and client relationships, turned profitable.

EDUCATION

Bachelor of Engineering · *Software Engineering*

Sept 2016 – Apr 2021

McMaster University | Hamilton, ON

- Achieving a cumulated **3.8 GPA** on a 4.0 scale, emphasis in **Data Structures & Algorithms** and **Software Design**.
- Received golden key award for students in the faculty of Engineering with a cumulative GPA in top 10% of the faculty.

SKILLS

Languages:

Python / Java / Kotlin / JavaScript / TypeScript / SQL / Go / Rust

Libraries & Frameworks:

Numpy / Pandas / Flask / TensorFlow / SciPy / React / Strands

Tools & Technologies:

AWS / Distributed Systems / REST APIs / Docker / Postgres / Linux / Agentic AI / Git
